

Zain Arshad

Full Stack Developer | Team Lead

zainarshad110@gmail.com | +92 325 4203035 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

Full Stack Developer and Team Lead with hands-on experience architecting enterprise web solutions and leading engineering teams from concept to delivery. Skilled in building scalable frontends with React and Next.js, developing robust backend systems with Django and FastAPI, and integrating modern headless CMS platforms such as Sitecore XM Cloud. Experienced in bridging technical execution with business strategy through direct collaboration with Business Managers and VPs. Recognized twice as Employee of the Month for leadership and delivery impact.

EDUCATION

Bachelor of Science in Computer Science, Government College University Lahore

Lahore, Pakistan

WORK EXPERIENCE

Team Lead / Engineering Lead — 7Kings Code

On-site — Lahore, Pakistan

1 Year – Present

- **Led end-to-end web application delivery for CWS**, a globally recognized German enterprise client, serving as Team Lead and owning system design, architecture, and full-cycle execution.
- **Architected scalable frontend layouts using Next.js** while leading implementation of **Sitecore XM Cloud**, a headless SaaS CMS, including Content Editor workflows tailored to CWS's enterprise requirements.
- Collaborated directly with Business Managers and VPs to translate strategic business goals into technical roadmaps, ensuring architecture decisions aligned with broader business objectives.
- Managed and mentored a development team, driving consistent code quality, ownership, and on-time delivery across projects.
- **Recognized as Employee of the Month twice within the past year** for technical leadership and delivery impact.

Frontend Developer — DIT, Government College University (GCU) Lahore

Lahore, Pakistan

- Worked in the IT Department responsible for the LMS and Campus Management System.
- Developed and maintained university software applications using **Node.js, Express.js, and React.js**, improving campus-wide digital workflows.
- Collaborated with a multidisciplinary team to design and implement new features aligned with departmental requirements, troubleshooting bugs and optimizing performance across multiple projects.
- Actively participated in **Agile development**, contributing to sprint planning, progress discussions, and timely completion of project milestones.

PROJECTS

GCU LMS & Official Website — Development, Maintenance & Feature Enhancements

Contributed to the development and maintenance of the GCU Learning Management System (LMS) and the university's official website by building new features, resolving bugs, and optimizing performance using React.js, Node.js, and Express.js. Improved digital workflows across campus through seamless integration of system components and enhanced UI responsiveness for students and faculty.

MedPredict AI — Brain Tumor Detection Platform

An AI-powered diagnostic platform that classifies brain tumors (Glioma, Meningioma, Pituitary, No Tumor) from MRI scans in under 2 seconds using a Swin Transformer via PyTorch and HuggingFace. Built with React 19 + Vite frontend and FastAPI backend, featuring JWT auth, auto-generated PDF reports (ReportLab), scan history, Recharts dashboards, and an admin panel. Deployed on Vercel and HuggingFace Spaces.
